

Linear Low Density Polyethylene Aramco LLDPE F2231

Aramco Trading

Product Description

Aramco LLDPE F2231 is a linear low density polyethylene resin and is typically used for cast film applications. Films made from this resin typically exhibits excellent optical properties and good tensile properties. This product is also typically suitable as base resin in cable compounding.

This product does not contain slip and anti-blocking agents.

Typical Applications

Hand and pallet stretch wrap, base resin for compounding of cable jacketing and low voltage cable insulation.

This product is not intended for use in medical and pharmaceutical applications.
