

Technical data sheet Polypropylene – Homopolymer **Produced** in Europe

Description

Polypropylene PPH 9099 is a polypropylene homopolymer with a Melt Flow Index of 27 g/10 min.

Polypropylene PPH 9099 is designed with a narrow molecular weight distribution and is intended for the extrusion of fine filaments in spunlaid nonwoven technologies (such as spunbond). It is characterised by excellent spinning properties and provides nonwovens with good mechanical properties and gas fading resistance.

Characteristics

	Method	Unit	Typical Value
